

SPECIFICATION DATA MODEL HDRV FORCED DRAFT BURNERS

FUELS BURNED AND CONTROL SYSTEMS

- Natural, Propane, Digester or Mixed Gas
- Light No. 2 thru Heavy No. 6 Fuel Oil Mechanical Pressure, Air or Steam Atomizing
- Modulating Control System Micro-Modulation or Linkage Fuel-Air Control by Metering Valves, Air Register and Venturi. Control Circuit Requires 120-60-1 Voltage

40300 MBH Maximum Input

- Input capacities based upon 1000' above sea level. Capacities decrease 4% for each additional 1000'.
- Gas input ratings based upon 1000 BTU/Cubic Foot and .64 specific gravity.
- Oil input ratings based upon 140,000 BTU/Gallon for No. 2 light oil and 150,000 BTU/Gallon for No. 4-6 oil.
- Positive furnace pressure ratings change 1.5% for each 0.25 W.C. change in furnace pressure. Consult factory on 4-pass boilers and furnace applications with higher draft loss than shown.

WEBSTER Series **HD** Burners are listed by **Underwriters Laboratories, Inc. (U.L.).** Also by the State of Massachusetts Fire Marshall, City of New York Board of Standards and Appeals, State of Minnesota, and can be packaged to meet specific requirements of IRI, FM, NFPA, MIL spec or other special insurance or local code requirements.

TYPICAL DIMENSIONS - INCHES

NOTE: DIMENSIONS WILL VARY WITH OPTIONAL CONTROL AND SYSTEM ARRANGEMENTS.

The Model **HD** Forced Draft Burner may be rotated 90° for boilers or other appliances with low center-line furnaces. For this version, an "L" suffix is added to the model number.

DIMENSIONS OF STANDARD ACCESSORIES

NOTE:

IT IS RECOMMENDED THAT OIL PUMP SETS AND AIR COMPRESSORS BE MOUNTED ON CONCRETE PADS AT LEAST 8 INCHES ABOVE THE WORKING FLOOR LEVEL.

[☐] The configuration of each unit will vary with specific job requirements such as, input rating, electrical specifications, and special agency approval codes. The above chart shows those items standard to a basic burner plus those options that may be added or selected.

ESSENTIAL ORDERING INFORMATION AND DATA:

- Power Supply Confirm 120-60-1 for control circuit and burner motor voltage required.
- Boiler or Heater to be fired manufacturer, model number, and furnace pressure at full firing rate.
- Firing Rate MBH for gas and GPH for oil.
- Fuel to be burned type of gas and/or oil and BTU value.
 Approval Agency UL, FM, IRI, NFPA, MIL spec and local code, if applicable.
- Flame Safety Control required manufacturer.
- Accessories required mounting plate, limit controls, etc.
